Australian Journal of Plant Physiology

Volume 11

Melbourne 1984

Australian Journal of Plant Physiology

A journal for the publication of the results of original research in all the main areas of plant physiology ranging from biochemistry and biophysics to whole-plant and environmental physiology and including structural, genetical and other aspects as related to function.

This journal is one of the Australian Journals of Scientific Research published by the Commonwealth Scientific and Industrial Research Organization with the cooperation of the Australian Academy of Science. Editorial policy for the journal series is developed by a Board of Standards appointed jointly by CSIRO and the Australian Academy of Science.

Advisory Committee

Acceptance of papers for this journal is in the hands of an Advisory Committee appointed after consultation with the Board of Standards, the Australian Society of Plant Physiologists and the New Zealand Society of Plant Physiologists. All papers are refereed externally. Committee members advise editors on the selection of referees and adjudicate in the case of conflicting or adverse reports.

Chairman J. S. Pate, University of Western Australia.

Members B. E. S. Gunning, Australian National University
P. E. Kriedemann, Waite Agricultural Research Institute
H. G. McPherson, Plant Physiology Division, DSIR (NZSPP)
C. B. Osmond, Australian National University
J. B. Passioura, Division of Plant Industry, CSIRO
N. A. Walker, University of Sydney
J. T. Wiskich, University of Adelaide (ASPP)
B. J. Walby (*Editor-in-Chief*)

Editor

L. W. Martinelli

Issued six times a year

Annual subscription
$A90 (surface)
$A102 (airmail)
$A30 (microfiche)

ISSN 0310-7841

The Notice to Authors is published in the first issue of each volume. Copies are available on request.

All inquiries and manuscripts should be forwarded to:

Authors and Titles

Aspinall, D. *See* Saini, H. S.

Baldo, B. A., Barnett, D., and Lee, J. W.
Lectins as cytochemical probes of the developing wheat grain. V. Demonstration of separate polysaccharides containing N-acetyl-D-glucosamine and D-galactose in nucellar epidermal cell walls 179
Barnett, D. *See* Baldo, B. A.
Beech, D. F., and Charles-Edwards, D. A.
Comparison of the growth and development of two selections of guar, *Cyamopsis tetragonoloba* (L.) Taub., with contrasting branching patterns 385
Begg, J. E. *See* Rawson, H. M.
Blagrove, R. J., Lilley, G. G., and Higgins, T. J. V.
Macrozin, a novel storage globulin from seeds of *Macrozamia communis* L. Johnson 69
Brady, C. J., *See* Speirs, J.
Brownell, P. F. *See* Grof, C. P. L.; Johnston, M.; Nable, Ross O.

Chalmers, D. J. *See* Dann, I. R.
Charles-Edwards, D. A. *See* Beech, D. F.
Clough, B. F.
Growth and salt balance of the mangroves *Avicennia marina* (Forsk.) Vierh. and *Rhizophora stylosa* Griff. in relation to salinity 419
Conover, Denis G., and Geiger, Donald R.
Germination of Australian channel millet [*Echinochloa turnerana* (Domin) J. M. Black] seeds.
I. Dormancy in relation to light and water 395
II. Effects of anaerobic conditions, continuous flooding, and low water potential 409
Craig, Stuart. *See* Lott, John N. A.

Dalling, Michael J. *See* Nicolas, Marc E.
Dann, I. R., Wildes, R. A., and Chalmers, D. J.
Effects of limb girdling on growth and development of competing fruit and vegetative tissues of peach trees 49
Dunstone, R. L. *See* Rawson, H. M.

Edwards, G. E. *See* Usuda, H.
El-Lakany, M. H. *See* Luard, Elizabeth J.

Farquhar, G. D., and Richards, R. A.
Isotopic composition of plant carbon correlates with water-use efficiency of wheat genotypes 539
Farquhar, G. D., and Wong, S. C.
An empirical model of stomatal conductance 191
Farquhar, G. D. *See also* Kirschbaum, Miko U. F.
Findlay, G. P. *See* Findlay, Nele
Findlay, Nele, and Findlay, G. P.
Movement of potassium ions in the motor tissue of *Stylidium* 451

Geiger, Donald R. *See* Conover, Denis G.
Gifford, Roger M. *See* Morison, James I. L.
Gleadow, Roslyn M. *See* Nicolas, Marc E.
Goodchild, D. J. *See* Lott, John N. A.
Grierson, D. *See* Speirs, J.
Grof, C. P. L., and Brownell, P. F.
Responses to ambient CO_2 concentrations by sodium-deficient C_4 plants 137
Grof, C. P. L. *See also* Johnston, M.
Gunning, B. E. S. *See* Palmer, M. V.

Handley, L., Hope, A. B., and Matthews, D. B.
Exogenous manganese as an electron source for both photosystem II and radical superoxides 443
Hatcher, A. I. *See* Tyerman, S. D.
Henry, R. J., Schibeci, A., and Stone, B. A.
Proton motive potential difference across the plasma membrane of plant cells: a comparison of cultured cells and protoplasts from Italian ryegrass (*Lolium multiflorum* Lam.) endosperm 119
Higgins, T. J. V. *See* Blagrove, R. J.
Hope, A. B., and Matthews, D. B.
Further studies of proton translocations in chloroplasts after single-turnover flashes. II. Proton deposition 267
Hope, A. B. *See also* Handley, L.

Jenner, C. F. *See* Singh, B. K.
Johnston, M., Grof, C. P. L., and Brownell, P. F.
Effect of sodium nutrition on chlorophyll *a/b* ratios in C_4 plants 325

Kallarackal, J., and Milburn, J. A.
Specific mass transfer and sink-controlled phloem translocation in castor bean 483
King, R. W. *See* Morgan, J. M.
Kirschbaum, Miko, U. F., and Farquhar, G. D.
Temperature dependence of whole-leaf photosynthesis in *Eucalyptus pauciflora* Sieb. ex Spreng. 519
Kriedemann, P. E., and Sands, R.
Salt resistance and adaptation to root-zone hypoxia in sunflower 287
Ku, M. S. B. *See* Usuda, H.

Larkum, A. W. D. *See* Tyerman, S. D.
Lee, E. *See* Speirs, J.
Lee, J. W. *See* Baldo, B. A.
Lilley, G. G. *See* Blagrove, R. J.
Loneragan, J. F. *See* Nable, Ross O.
Long, M. J. *See* Rawson, H. M.
Lott, John N. A., Goodchild, D. J., and Craig, Stuart
Studies of mineral reserves in pea (*Pisum sativum*) cotyledons using low-water-content procedures 459
Luard, Elizabeth J., and El-Lakany, M. H.
Effects on *Casuarina* and *Allocasuarina* species of increasing sodium chloride concentrations in solution culture 471
Ludlow, M. M. *See* Sheriff, D. W.

Marcellos, H., and Single, W. V.
Frost injury in wheat ears after ear emergence 7
Markhart, A. H. III *See* Smit-Spinks, B.
Matthews, D. B. *See* Handley, L.; Hope, A. B.
McGrath, J. F., and Robson, A. D.
The influence of zinc supply to seedlings of *Pinus radiata* D. Don on the internal transport of recently absorbed zinc 165
Milburn, J. A. *See* Kallarackal, J.
Milthorpe, F. L. *See* Thorpe, Nicolette
Morgan, J. M., and King, R. W.
Association between loss of leaf turgor, abscisic acid levels and seed set in two wheat cultivars 143
Morison, James I. L., and Gifford, Roger M.
Plant growth and water use with limited water supply in high CO_2 concentrations. I. Leaf area, water use and transpiration 361
II. Plant dry weight, partitioning and water use efficiency 375
Munns, Rana, and Passioura, J. B.
Effect of prolonged exposure to NaCl on the osmotic pressure of leaf xylem sap from intact, transpiring barley plants 497
Hydraulic resistance of plants. III. Effects of NaCl in barley and lupin 351
Munns, Rana *See also* Passioura, J. B.

Nable, Ross O., and Brownell, P. F.
Effect of sodium nutrition and light upon the concentrations of alanine in leaves of C_4 plants 319
Nable, R. O., and Loneragan, J. F.
Translocation of manganese in subterranean clover (*Trifolium subterraneum* L. cv. Seaton Park).
I. Redistribution during vegetative growth 101
II. Effects of leaf senescence and of restricting supply of manganese to part of a split root system 113
Nerson, Haim *See* Pinthus, Moshe J.
Nicolas, Marc E., Gleadow, Roslyn M., and Dalling, Michael J.
Effects of drought and high temperature on grain growth in wheat 553

Offler, C. E., and Patrick, J. W.
Cellular structures, plasma membrane surface areas and plasmodesmatal frequencies of seed coats of *Phaseolus vulgaris* L. in relation to photosynthate transfer 79

Palmer, M. V., and Gunning, B. E. S.
Cytokinin-induced mitosis in cultured explants of *Helianthus tuberosus* L. tuber tissue 1
Palni, L. M. S.
Cytokinin accumulation in the culture medium of *Vinca rosea* L. crown-gall tissue: a time-course study 129
Passioura, J. B.
Hydraulic resistance of plants. I. Constant or variable? 333
Passioura, J. B., and Munns, Rana
Hydraulic resistance of plants. II. Effects of rooting medium, and time of day, in barley and lupin 341
Passioura, J. B. *See also* Munns, Rana
Patrick, J. W., and Wardlaw, I. F.
Vascular control of photosynthate transfer from the flag leaf to the ear of wheat 235
Patrick, J. W. *See also* Offler, C. E.

Pinthus, Moshe J., and Nerson, Haim
Effect of photoperiod at different growth stages on the initiation of spikelet primordia in wheat 17

Rathert, G.
Sucrose and starch content of plant parts as a possible indicator for salt tolerance of crops 491
Rawson, H. M., Dunstone, R. L., Long, M. J., and Begg, J. E.
Canopy development, light interception and seed production in sunflower as influenced by temperature and radiation 255
Richards, R. A. *See* Farquhar, G. D.
Rimmington, G. M.
A model of the effect of interspecies competition for light on dry-matter production 277
Robson, A. D. *See* McGrath, J. F.

Saini, H. S., Sedgley, M., and Aspinall, D.
Developmental anatomy in wheat of male sterility induced by heat stress, water deficit or abscisic acid 243
Sands, R. *See* Kriedemann, P. E.
Schibeci, A. *See* Henry, R. J.
Sedgley, M. *See* Saini, H. S.
Sheriff, D. W., and Ludlow, M. M.
Physiological reactions to an imposed drought by *Macroptilium atropurpureum* and *Cenchrus ciliaris* in a mixed sward 23
Singh, B. K., and Jenner, C. F.
Factors controlling endosperm cell number and grain dry weight in wheat: effects of shading on intact plants and of variation in nutritional supply to detached, cultured ears 151
Single, W. V. *See* Marcellos, H.
